

# PMI® Maltodextrin

## LD104\*

### DESCRIPTION

PMI® Maltodextrin is designed for use in preparing isocaloric liquid diets containing alcohol or another test substance. It is a source of carbohydrates.

### Features and Benefits

- Stable Carbohydrate
- Suspends readily in diets
- Easily stored
- Compatible with liquids

### Product Forms Available

- Dry Powder
- Dry Powder, Irradiated

### Catalog #

2611189  
2610929

### INGREDIENTS

Maltodextrin

### USE DIRECTIONS

Use as specified in the Diet Preparation Instructions for the liquid diets. When used as directed, isocaloric diets containing varied levels of alcohol can be prepared. See PMI® Liquid Diet product information sheet for more details.

### CALORIC VALUE

Carbohydrate ingredients in ethanol-containing diets have routinely been calculated at an energy value different from that used in other diet formulations.

Maltodextrin (in alcohol diets) - 3.96 kcal/gm Physiological Fuel Value (commonly used in other diets) = 4 kcal/gm.
